

India • 2026 → 2030

India mein AI Automation Agency ka Future

*Demand kahan hai, client kis cheez ke paise dega, aur chhoti agency kaise
jeetegi — poora funda*

- Abhi kyun
- Purani vs nayi agency
- Paisa dene wale niche
- Business model

No hype. Sirf wahi jo kaam kar raha hai.

* Agency ka shape badal raha hai

Jeetne wale ab "ek bot" nahi bechte — wo roz chalne wala working system bechte hain.

	Purani (2023-24)	Nayi (2026+)
Behti hai	Ek chatbot, ek baar	Ek result — "koi lead bina reply ke nahi"
Banati hai	Rule-based flows	AI agents + insaan ko hand-off
Bhasha	Sirf English	Hinglish, Marathi, Hindi — voice aur text
Kamaai	Setup fee, fir gayab	Setup + <u>monthly retainer</u>
Proof	Screenshots	Numbers — bache hue leads, bache hue ghante

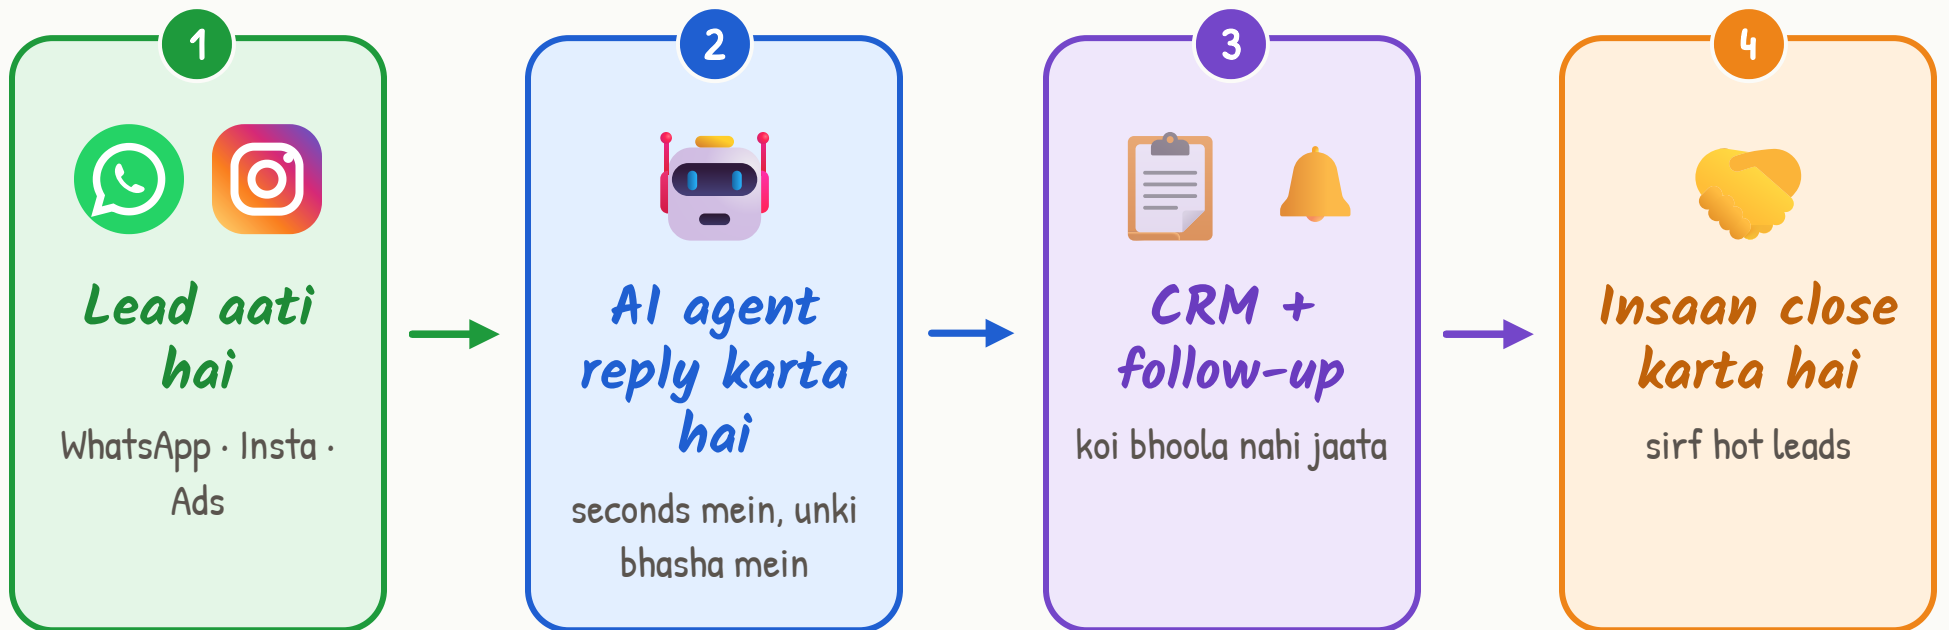

Retainer → hi asli product hai. Build sirf entry ticket hai.

- Client ko kuch maintain nahi karna — bas chalta rehna chahiye
- Har API, price ya Meta rule change = har mahine aapki zaroorat

✍️ Aap actually kya bechte ho

* Standard AI automation stack

Agle kuch saal mein lagbhag har client project isi flow ka koi version hoga:

- Speed jeetti hai — jo pehle reply karta hai, customer usi ka
- AI qualify karta hai, owner close karta hai — insaan ko poora replace mat karo
- Baad mein add karo: voice agents, invoice, review request, reports

agli badi wave hai — Indian owners typing se zyada call pasand karte hain.

Tip: poora flow ek package mein becho. Sirf bot = commodity; bot + CRM + follow-up jo **meeting book kare** — wo asli business result hai.

SAHAS *a*[★]

Thank you!

Save karo, aur us business owner ko bhejo jo abhi bhi sab kuch haath se kar raha hai.

Sahas AI Business Automation Agency

Indian SMEs ke liye automation — har hafte aise hi notes.
